Finally: True 360° DICOM Sync.
Automatic. Instant. Bi-Directional.

From patient schedule to completed report in the chart —
zero touch, zero errors, in real time.

Virtual Field's DICOM 360 Sync is the industry's first **automatic, realtime, bi-directional sync** designed to eliminate wasted time, reduce human error, and deliver seamless interoperability — *included in the Virtual Field VF3 Pro at no extra cost*. Validated in real clinics, it's already proving to save minutes per exam, increase throughput, and improve both staff and patient experiences.

This breakthrough automation is built on **three revolutionary features**, each transforming a critical step in your exam workflow.

How it works:

1. Realtime Modality Worklist

Virtual Field **pulls** patient demographics and exam orders directly from your EMR/EHR via PACS. No manual typing, no toggling screens, no setup delays — just instant test readiness.
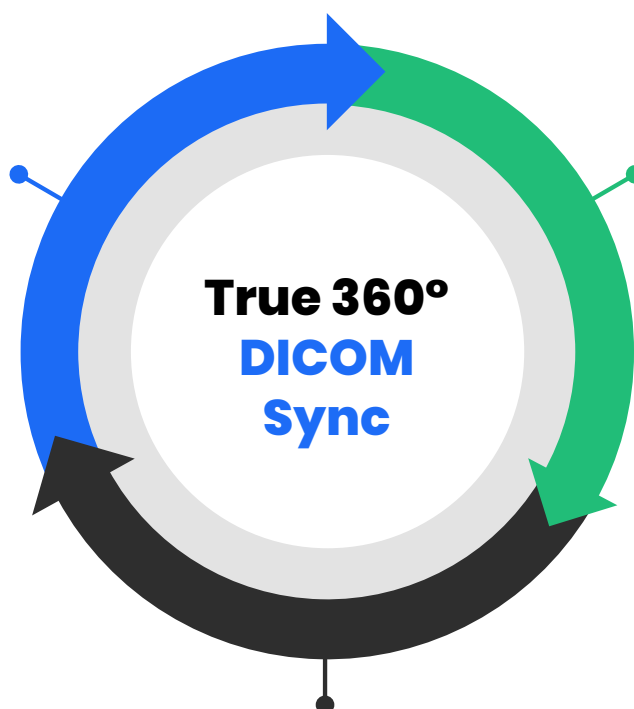

2. Realtime Report Sync

Virtual Field **pushes** finalized exam reports back to the EMR/EHR automatically. The moment the test ends, the report is securely filed in the correct PACS record, giving doctors immediate access with zero uploads required.

True 360° DICOM Sync

DICOM 360 Sync:

Pull.
Push.
Pair.
Perfect.

3. Realtime Match and Attach

Virtual Field **pairs** every exam with the correct patient record automatically. Reports are matched, labeled, and attached with precision, eliminating misfiles, preventing compliance risks, and ensuring data integrity.

The outcomes:

- **Significant Time Savings**: Minutes saved per exam free up staff and unlock higher daily patient capacity.

- **Workflow Efficiency:** No more bottlenecks. Your techs can focus on your patients, and doctors get instant results.

- **Error Elimination:** Automated matching and syncing prevent misfiles, lost reports, and re-tests.

- **Better Experience:** Staff burnout decreases, patients wait less, and the clinic feels modern and efficient.

- **Proven in Real Clinics:** Validated in practice, delivering measurable gains in speed, accuracy, and throughput.

360°

And unlike competitors who charge for clunky add-ons, **DICOM 360 Sync is included in the Pro package at no additional cost.**
